

JULY 2018

Monthly commentary

Net Asset Value

The Net Asset Value (NAV) per Class A US\$ share as at 31 July 2018 was US\$193.82. In July the NAV was up 3.6% whilst the S&P Dollex 30 (BSE Sensex US\$ equivalent) was up 6.0%. In local currency the NAV was up 3.7%.

Portfolio update

Positive contribution to the portfolio's performance was driven by Balkrishna Industries (up 16.0%), NIIT Technologies (up 11.8%) and LIC Housing Finance (up 12.9%). The negative contribution mainly stemmed from D.B.Corp was down 8.6% and Cholamandalam Investment was down 5.4%.

Market and economic update

India's equity markets rallied across the board as global oil prices slid back below \$70 per barrel. "Main Board" stocks rose 6.2% whilst the BSE Mid Cap Index recovered some 4.0%, following a bleak half year. The downward move in the oil price also supported the Rupee/Dollar exchange rate after recent weakness; the Rupee depreciated 0.1% against the US Dollar and 0.2% against Sterling. Both Foreign and Domestic Institutions were net buyers for the month; US\$208m and US\$612m respectively.

The Reserve Bank of India (RBI) raised lending rates by 0.25% to 6.5% on 1st August for the second time since June, on the back of rising consumer price inflation and the imported costs of higher oil. The RBI retained its "neutral" stance however,

intending to contain inflation without choking growth. But clearly the focus is to contain inflation within the target band, and particularly since the Government is intent on raising minimum support prices for key crops well above prior year's prices. This hike will also lend support to the currency, in some manner. The RBI also maintained its real GDP growth projection at 7.4% for this financial year (FY19), but raised its inflation estimates slightly to 4.8%. A target 5% inflation rate for first quarter of FY20 was also introduced.

Indian companies began reporting Q1FY19 (30 June ended) results. To date these results have been mixed. The IT Services, Consumer Staples and Capital Goods sectors have all outperformed expectation, with Consumer Staples the standout, reporting double digit volume growth. These companies are benefitting from a favourable base effect on volumes, since last year's numbers were dulled by problems surrounding the implementation of GST. Management commentary indicates that rural consumption continues to outpace urban consumption, as the benefits of prior monsoons and recent Government sops feed through. However passing on input cost pressures remains a challenge, pressuring margins. Elsewhere, private sector financials reported healthy retail loan growth, but earnings suffered from treasury losses (mark to market) and net interest margin weakness. Corporate loan books also suffered higher provisioning which continued to dent profits, but there was better news on the overall decline in the gross and net NPL ratios.

Important information

The information in this document does not constitute or contain an offer or invitation for the sale or purchase of any shares in the Fund in any jurisdiction, is not intended to form the basis of any investment decision, does not constitute any recommendation by the Fund, its directors, agents or advisers, is unaudited and provided for information purposes only and may include information from third party sources which has not been independently verified. Interests in the Fund have not been and will not be registered under any securities laws of the United States of America or its territories or possessions or areas subject to its jurisdiction, and may not be offered for sale or sold to nationals or residents thereof except pursuant to an exemption from the registration requirements of the U.S. Securities Act of 1933, as amended (the "Securities Act"), and any applicable state laws. While all reasonable care has been taken in the preparation of this document, no warranty is given on the accuracy of the information contained herein, nor is any responsibility or liability accepted for any errors of fact or any opinions expressed herein. Past performance is not a guide to future performance and investment markets and conditions can change rapidly. Emerging market equities can be more volatile than those of developed markets and equities in general are more volatile than bonds and cash. The value of your investment may go down as well as up and there is no guarantee that you will get back the amount that you invested. Currency movements may also have an adverse effect on the capital value of your investment. Investing in a country specific fund may be less liquid and more volatile than investing in a diversified fund in the developed markets. This Fund should be seen as a long term investment and you should read the Prospectus whilst paying particular attention to the risk factors section before making an investment. Please refer to the Prospectus for specific risk factors. Where reference to a specific Class of security is made, it is for illustrative purposes only and should not be regarded as a recommendation to buy or sell that security. Market index information shown herein such as that of the S&P BSE Dollex 30 is included to show relative market performance for the periods indicated and not as standards of comparison, since indices are unmanaged, broadly based and differ in numerous respects from the Fund. This document is issued by Ocean Dial Asset Management Limited and views expressed in this document reflect the views of Ocean Dial Asset Management Limited and its Mumbai based affiliated company and advisor, Ocean Dial Advisers Private Limited as at the date of publication. Ocean Dial Asset Management Limited is authorised and regulated by the Financial Conduct Authority in the United Kingdom. Registered office 13/14 Buckingham Street, London WC2N 6DF.

Fund adviser

Sanjoy Bhattacharyya has a career in the Indian capital markets that spans 25 years, initially as Head of Research at UBS Warburg Securities

(India) before becoming CIO of HDFC Asset Management. Latterly he joined New Vernon Advisory as a Partner before setting up Fortuna Capital. He joined Ocean Dial in April 2013 and acts as an exclusive investment adviser to the Gateway to India Fund. Sanjoy has an MBA from the Indian Institute of Management, Ahmedabad.

Investment philosophy

The investment manager believes that in India, optimal returns will be generated over time by investing in companies that are well placed to benefit from the structural growth potential of the Indian economy, combined with the highest quality of management best able to exploit this opportunity. The fund uses a consistent and disciplined bottom up stock picking process to select investments from our best ideas, unconstrained by a benchmark.

Regulatory information

Any views expressed within this fact-sheet are those of the Fund Manager as at the date of issue which may be subject to change, and should not be taken as advice to invest. We do not undertake to advise you as to any changes in our views. If you are unsure about the suitability of any investment, please consult a Financial Adviser.

The Gateway to India Fund is a sub-fund of Ocean Dial Investment Funds plc, an Irish UCITs investment company.
