

Key Investor Information

This document provides you with key investor information about the Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of the Fund. You are advised to read it so you can make an informed decision about whether to invest. Unless otherwise defined in this document, all words and expressions defined in the Company's current Prospectus shall have the same meaning herein.

Ocean Dial Emerging India Fund (the "Fund"), a sub-fund of Ocean Dial Investment Funds plc (the "Company")

This Fund is managed by Ocean Dial Asset Management Limited

Class A US\$ (the "Share Class")

This Key Investor Information Document is also considered representative of **Share Class B Euro** and **Share Class C GBP**

Objectives and Investment Policy

The Fund's objective is to provide long term capital appreciation.

The Fund intends to achieve its investment objective by investing primarily in a diversified portfolio of equities and equity related securities of (i) small and mid-cap companies (i.e. companies that have a market capitalisation of US\$ 5 billion or lower) that have their registered office in India and are listed on Recognised Exchanges worldwide, (ii) small and mid-cap companies that exercise a preponderant part of their economic activity in India and are listed on Recognised Exchanges worldwide and/or (iii) small and mid-cap companies whose equity and equity related securities are listed, traded or dealt in on Indian stock exchanges listed in Appendix II of the Prospectus.

The Fund may also invest in aggregate up to 10% of its net assets in equities and equity related securities issued by the types of companies set out at (i), (ii) and (iii) above which are unlisted.

The Fund may invest up to 10% of its Net Asset Value in aggregate in other collective investments schemes in order to gain exposure to assets consistent with the investment policy of the Fund.

Investments will be selected based on fundamental, analysis and research to identify companies whose stock prices are deemed to be undervalued in relation to their historic prices,

their direct industry competitors or the overall market, and have prospects for above average earnings growth in the future.

Shares in the Fund can be bought and sold daily on the first Business Day of each Calendar Week (i.e. the Dealing Day). Subscription and redemption applications must be received by 1.30pm (Irish time) on the sixth Business Day preceding the relevant Dealing Day.

The Fund is an accumulating fund and, therefore, it is not currently intended to distribute dividends to the Shareholders.

The fund manager has discretion in managing the investments of the Fund.

The Fund may use financial derivative instruments for both investment purposes and for the purposes of hedging. The use of these instruments may result in the Fund being leveraged i.e. the total exposure of the Fund as a result of all positions held by it may exceed its net asset value.

Portfolio transaction costs may have an impact on the performance of the Fund.

The Fund is expected to have a high volatility. The typical investor in the Fund will be a sophisticated investor with a medium to long investment time horizon who understands the risks associated with investment in the emerging markets.

Risk and Reward Profile of the Fund

Lower Risk

Higher Risk

Typically lower rewards

Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The risk and reward indicator has been calculated using the average fluctuations of the Fund's benchmark, the S&P BSE MidCap Total Return Index (the "Benchmark"). Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not a target

or a guarantee and may change over time. Historical data may not be a reliable indication for the future.

- The lower risk category does not mean a risk-free investment.
- The Fund may behave differently to the Benchmark, and the Benchmark may also behave differently in the future. This means the Fund is not guaranteed to always stay in the same risk reward category.
- The high risk rating reflects the high degree of risk in investing in emerging markets generally, and India in particular. The market prices of Indian securities can move sharply on relatively small trading volumes. It also reflects that the Fund is not only exposed to market price movements, but also to the value of the Indian Rupee

relative to the share class currency. The Fund's policy is not to hedge Rupee exposure.

Further risks that may have a significant effect on the Net Asset Value of the Fund include:

- Liquidity risk - the risk that a given security cannot be traded quickly enough in the market to prevent a loss or make a profit.

- Credit Risk - the risk that the issuer of a security held by the Fund may not be able to meet its obligations to the Fund.
- Settlement risk – the risk that the purchaser of Shares in the Fund does not settle within T+1 deadline. The Fund is liable for any movements in the Net Asset Value during the settlement period.
- The Company's Prospectus gives you more details about all the risks for the Fund - see under "Practical Information" for how to obtain a copy.

Charges for the Fund

These charges are used to pay the costs of running the Fund, including the costs of marketing and selling. Overall, they reduce the growth of your investment.

One-off charges taken before or after you invest	
Entry charge	Nil%
Exit charge	3%. This may be charged if you hold Shares in the Fund for less than 12 months.
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the Share Class over a year	
Ongoing charge	1.55%
Charges taken from the Share Class under certain specific conditions	
Performance fee	0.00%

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser.

The ongoing charges figure shown here is an estimate of charges as there is insufficient historical data. The annual report of the Company for each financial year will include detail on the exact charges made.

For more information about charges and the performance fee, please see the Fund's Prospectus, which is available at www.oceandial.com

Past Performance

The Class A US\$ share class was launched on 24 April 2018. At the date of this document, the share class does not have performance data for one complete calendar year to provide a useful indication of past performance to investors.
